

A wide selection of high style, quality upholstery fabrics gives your furnishings a bright new look, and Lily's Window Fashions now offers a traditional line of furniture so you can browse the catalogue at your leisure for couches, sectionals, ottomans and dining room chairs and occasional chairs.

Another new venture is an art gallery, which you can also view on the Web. You may select an impressionist painting by a world-famous artist - Monet or Van Gogh. Or you can order your own original oil from professional artists working in the techniques of the masters. Colors may be enhanced, and sizes scaled to fit your room.

**EUROPEAN HOME DEVELOPMENT INC.,** in Wheeling, is a company that imports high-end home improvement fixtures and accessories and sells them at factory-direct prices. Their motto is, "Warehouse prices - world class design."

President Dmitry Lapan founded the company to assist custom builders, designers and contractors, and their clients, in finding unusual products to give homes that European look. In its efforts to bring new and exciting products to Chicago, it draws on new name brands as well as new concepts.

Pre-finished exotic hardwood flooring is the first thing customers see when they enter the spacious warehouse showroom. Exotic woods like Balzamo, Garappa, Dialium, Kempass and Cumaru

have always been hard to find and in demand, and are growing in popularity among highly selective clients. A state-of-the-art process not yet used in North America preserves the stunning look of their natural high-gloss colors.

Water lovers will relish the modern shower panels featuring as many as eight spray jets to massage and cleanse the body. The stunning panels are made of durable materials ranging from fiberglass to stained tempered glass and come in an array of lush, sensual, colors.

The sleek design of shower cabins emphasizes both form and function. One cylindrical shower cabin, packed with features, is designed to look like a space module. Computerized bathroom units include steam shower, whirlpool, water acupuncture massage, shaving mirror, AM/FM radio and telephone. An array of sensors and an internal computer ensure a safe and pleasant experience. The best part is that these units fit into 60-inch wide spaces and can be disassembled for portability.

Sublime meets sensual with high grade molded bathtubs - deeper and wider than average tubs - supported by decorative solid brass claw or cylinder feet. Also available are computerized whirlpools with electronic temperature control, AM/FM radio, and a convenient shower handle. These bathtubs promise long hours of relaxation and pleasure.

At the recent Chicago Design show, smooth

seamless designs were the rage.

The products at European Home Development are state-of-the-art and new to the U.S. market. One example is one-piece seamless toilets that appear to come out of the wall and offer water saving features.

"As you may know, there are many design shows in Europe where designers show off their latest creations and factories negotiate for the rights to reproduce them. Most of the products you see in our showroom are the latest design concepts put into production," said Lapan.

European Home Development also sells classic and contemporary hand-crafted marble fireplace mantles in traditional white or sumptuous pink. Attractive solid core mahogany door sets, recommended by security experts, feature solid brass roller hinges and add a warm yet sophisticated look to any room or closet. Fiber-plaster crown moldings are durable, easy to work with and come in a variety of styles ready for painting.

A newcomer to the North Shore, 21-year-old **DESIGNS OF THE INTERIOR -- DOTI --** recently opened in Winnetka and Glenview, offering one-stop shopping for an upscale clientele that likes unique and spectacular items for its décor.

DOTI design consultants provide a personalized service for projects that reflect your
